Immunologist with multidisciplinary skills in cellular, molecular, bioinformatics and clinical research

Snapshot

I am an energetic ambitious immunologist with a clear goal to build an independent research platform. My research passion is which factors control mononuclear phagocyte (macrophage) differentiation during inflammation and how this impacts on disease. My most recent work is currently under revision in the top ranked Immunology journal (IF 31). I am ready to educate the next generation of doctors and scientists and lead my own group to make transformative discoveries in Immunology.

Outreach and organisation

Discover Research Night, Dublin Sep 2014. Marie Skłodowska-Curie-funded. I was the event organiser responsible for public engagement at Trinity Biomedical Sciences Institute, organising a team of 50 researchers in leading themed tours of scientific facilities. We were the most subscribed event of Dublin Research Night (>500 members of the public) 8 weeks' full-time.

10th International Symposium on Bordetella, Sep 2013. Logistics manager responsible for operations of the conference including registration, AV equipment and support for speakers.

Manchester Immunology Group Seminar Series, May 2017 – Sep 2018. Co-lead organiser. Handling invitations, hospitality, communications, for renowned international speakers to visit University of Manchester.

School talk, Oaklands Community College, Edenderry Co. Offaly, 2021. "The life of a scientist".

Single Cell TCD Core facility. I formed a working group in 2021 to address the competitive disadvantage of not having a working single cell RNA-sequencing in TCD. The service was soft launched internally in 2022 on a cost-for-service basis and delivers a full pipeline from consultation, cellular isolation, library preparation, sequencing, bioinformatics and basic downstream analysis. I am to expand this to a full service and hire talent to expand the capability of this service to include external industry clients.
